Assurance of Learning Committee

Minutes

August 26, 2015

Attendance: Snavely, Crews, Hunt, Zimmer, Gardner, Hernsberger, Rhoades, Spiller

Meeting opened with introductions since this is the first meeting of the committee for the 2015-16 academic year.

Dean Katz attended to emphasize that the committee's charge is important to the college's mission, and that the committee has his full support. He also reminded the committee that focus on the AoL process for the MBA program is crucial for the next review and must be completed for all three delivery methods

Shane Spiller described the importance of a complete report from AoL for AACSB. This includes closing the loop at least two times for each learning goal. It is important to provide a complete story when assessing AoL artifacts. Assessors will need to dig deeper to determine whether there are any weaknesses in student performance.

Jean Snavely agreed with Shane that the committee will need to provide more detail (complete story) for the next AACSB review.

Jean introduced the following items for consideration and to work on this semester:

Web site design and content

More detailed course mapping for each learning goal

Instrument for providing additional detail when evaluating learning goals

There were no formal items for consideration at this meeting.

Next meeting: September 16, 2015 at 12:30 in GH 341.
