

Minutes from the AOL Meeting Sept. 14, 2012

Present:: Revels, Coder, Spiller, Gardner, Zimmer,Wade, & Blankenship

1. There was some discussion to see if the committee wanted to continue doing the senior exit exam along with the embedded questions for Goal 6 (Discipline Knowledge).
2. There was some discussion about the objective coverage in the core course matrix. This will be continued until the next meeting after all the departmental representatives have had a chance to confer with their departments.
3. The committee discussed the need for goal 3 (Strategic Use of Technology). Currently the strategic use of technology is being taught on a limited basis in CIS 243 and the coverage is very minimal in the Strategic Management course which makes it difficult to measure. The committee then discussed changing the goal to just the "use of information technology". The committee felt that the use of information technology was incorporated throughout the curriculum and that a separate goal for this is not necessary.

It is the recommendation of the AoL committee that Goal 3 be dropped from the list of goals for the college. The use of technology in all disciplines is mature enough that a separate goal for just the use of technology is not warranted. Currently the use of technology is being captured in the measurement of Goal 6 (

2. Representative should ask their departments if the current topics/ goals are still being covered as listed in the core requirements matrix. A qualifier for this would be to ask if data could be collected to prove you covered this topic/goal in your course.
3. For the results of the strategic use of information technology (Goal 3), a mini case will be found and the measurement will be conducted again. It was felt that the Philippine Healthcare Case is not appropriate for measuring this goal.
4. Goal 4, Critical Thinking was reviewed and objective 13 was deleted. "13. Our graduates will be able to demonstrate the ability to make good decisions." Since we are not measuring "good decision making" the committee agreed to delete this objective.

Everyone is asked to review the rubric for this goal before our next meeting so a revised rubric can be used for evaluating this goal.

5. Discussed the need to revise questions for the embedded measures for goal 6, discipline knowledge. Everyone agreed to have revised questions to Ray by September 14, 2012.

Our next meeting is September 14, 2012 – MGT & IS conference room at 1:00.
