

Many dental schools require the following courses before being considered for admittance. These are general recommendations, as specific requirements vary by school. These courses must be completed with a minimum grade of 'C', higher preferred. Requirements are subject to change each year. **Be sure to research schools of interest for current prerequisites.**

BIOL 120/121 Biological Concepts I (4)

BIOL 122/123 Biological Concepts II (4)

BIOL/CHEM 446 Biochemistry (3)

BIOL 226/227 Microbial Biology & Diversity (4)

or **BIOL 207/208** General Microbiology (4)

CHEM 120/121 College Chemistry I (5)

CHEM 222/223 College Chemistry II (5)

CHEM 340/341 Organic Chemistry I (5)

CHEM 342/343 Organic Chemistry II (5)

PHYS 231/232 Physics & Biophysics I (4)

Two Semesters of English/ Communications

Some schools recommend/require:

MATH 183 Statistics | **BIOL 324** Histology

PHYS 332/233 Physics & Biophysics II

BIOL 131/231 Human Anatomy & Physiology

Other courses that will assist in DAT preparation and with your first 2 years in dental school include: Genetics, Animal Biology & Diversity, Animal Physiology, Cell/Molecular Biology, Immunology, and Psychology.

Additionally, consider a course like ART 102 to develop 3D visual perception skills.

Note: Some schools do not accept AP credit. **In consultation with your advisor(s), it is vital to research all programs of interest to ensure all prerequisite courses and experience requirements are met before matriculation.**

What should my major be?

You can major in anything you like to prepare for dental school as long as you fulfill the prerequisites for your professional school of interest. A major in the sciences is not required. However, having a strong background in the sciences will certainly help you as you pursue pre-dentistry, as it gives you a good foundation to build upon. "Pre-Dentistry" is not a major, but is an 'advisement' that should be declared alongside your major in order to receive specialized advising towards your goal of attending dental school.

Application Checklist - Start Now!

- **ADVISING** | Meet with a pre-health advisor ASAP to map out your plan toward dental school admission. Plan to meet with your pre-health advisor consistently throughout your journey.
- **RESEARCH** | Determine which dental schools you are interested in. A good place to start is the ADA or ADEA websites, where you can find information on dental programs and their timelines.
- **PREREQUISITES** | Research each school to understand and begin work as soon as possible on their application requirements including courses, GPA, shadowing, patient care, etc.
- **TIMELINE** | Know the application start date and deadlines for each school you are interested in. Some schools have rolling admissions. The AADSAS application opens in May.
- **EXPERIENCE** | Start early with shadowing, volunteering, and working with patients. Research and strive to exceed the number of hours each program of interest requires.
- **INVOLVEMENT** | Be involved in meaningful activities such as research, community service, work, and extracurriculars that are meaningful and unique. Well-rounded applicants are more competitive.
- **RECOMMENDATIONS** | Determine what types and how many references your schools of interest prefer and begin building relationships with potential letter writers/ committee members.
- **DAT** | Study for the DAT at least 6 months prior to attempting the test. Register for your desired date as soon as possible, taking it during the spring a year prior to matriculation.
- **PERSONAL STATEMENT** | Start to write your personal essay prior to the application in a word document. Be sure to edit it carefully and have others review and edit as well.
