

**Assurance of Student Learning Report
2020-2021**

College of Health and Human Services

Department of Public Health

Environmental Health Certificate 1743

Grace Lartey

Use this page to list learning outcomes, measurements, and summarize results for your program. Detailed information must be completed in the subsequent pages.

Student Learning Outcome 1: Students will describe the relationship between environmental factors and health.

Instrument 1 Direct Measure: ENV 280 Assignment

Instrument 2

Instrument 3

Based on your results, check whether the program met the goal Student Learning Outcome 1.

X Met

Not Met

Student Learning Outcome 2: Students will identify environmental techniques used to protect resources for community well-being.

Instrument 1 Direct Measure: PH 385 Assignment

Instrument 2

Instrument 3

Based on your results, check whether the program met the goal Student Learning Outcome 2.

Met

Not Met

Student Learning Outcome 3: Students will review environmental health-related policies and their implication on public health.

Instrument 1 Direct Measure: ENV 460 Assignment

Instrument 2

Instrument 3

Based on your results, check whether the program met the goal Student Learning Outcome 3.

Met

Not Met

Program Summary (Briefly summarize the action and follow up items from your detailed responses on subsequent pages.)

There are two students currently enrolled in the Certificate program; however, only one registered in two of the three courses identified as assessment data source. This is insufficient to provide accurate and fair assessment of the program overall. Program will be evaluated again during the 2021/22 academic year.

Student Learning Outcome 1

Student Learning Outcome	Students will describe the relationship between the environment and health.		
Measurement Instrument 1	ENV 280 Assignment Direct Measure: Students will use the water footprint calculator to calculate how much water they use and ways to reduce their water usage to protect the environment.		
Criteria for Student Success	Students will demonstrate how they can reduce their water usage.		
Program Success Target for this Measurement	80% of students will score 80 or higher on the assignment.	Percent of Program Achieving Target	The only student enrolled in the course scored higher than 80% on the assignment.
Methods	Two students were enrolled in the program during the 2020/21 academic year. One student received transfer credit for the course. The other student scored higher than the 80% target on the assignment. Course instructor(s) will provide assessment data yearly.		
Measurement Instrument 2			
Criteria for Student Success			
Program Success Target for this Measurement		Percent of Program Achieving Target	
Methods			
Measurement Instrument 3	Do you have other measures of assessment for SLO 1? If so, please add that here along with all the information below. If not, you may delete this section and move on to “... whether the program met the goal Student Learning Outcome 1.”		
Criteria for Student Success			
Program Success Target for this Measurement		Percent of Program Achieving Target	
Methods			

Based on your results, highlight whether the program met the goal Student Learning Outcome 1.		X <input type="checkbox"/> Met	<input type="checkbox"/> Not Met
Actions (Describe the decision-making process and actions for program improvement. The actions should include a timeline.)			
There are two students currently enrolled in the Certificate program; however, only one registered in two of the three courses identified as assessment data source. This is insufficient to provide accurate and fair assessment of the program overall. Program will be evaluated again during the 2021/22 academic year.			
Follow-Up (Provide your timeline for follow-up. If follow-up has occurred, describe how the actions above have resulted in program improvement.)			
Program will be evaluated in the 2021/22 academic year.			
Next Assessment Cycle Plan (Please describe your assessment plan timetable for this outcome)			
Certificate program will be reviewed again during the 2021/22 academic year. Course instructors will provide assessment data.			

Student Learning Outcome 2			
Student Learning Outcome	Students will identify environmental techniques used to protect resources for community well-being.		
Measurement Instrument 1	PH 385 Assignment Direct Measure: Students will write a paper/blog on an environmental health issue discussed in the media, identify the health risks of the issue to populations and recommend strategies for preventing or reducing the health hazard.		
Criteria for Student Success	Students will identify a current environmental health issue in the media, discuss the associated risks.		
Program Success Target for this Measurement	80% of students will score 80 or higher on the assignment.	Percent of Program Achieving Target	One out of the two students enrolled in the program registered for the course during the year under review and scored higher than 80% on the assignment.
Methods	Two students were enrolled in the program during the 2020/21 academic year, however, only one of them registered for the course. This student scored higher than the 80% target on the assignment. Course instructor(s) will provide assessment data yearly.

Actions (Describe the decision-making process and actions planned for program improvement. The actions should include a timeline.)			
There are two students currently enrolled in the Certificate program; however, only one registered in two of the three courses identified as assessment data source. This is insufficient to provide accurate and fair assessment of the program overall. Program will be evaluated again during the 2021/22 academic year.			
Follow-Up (Provide your timeline for follow-up. If follow-up has occurred, describe how the actions above have resulted in program improvement.)			
Program will be evaluated in the 2021/22 academic year.			
Next Assessment Cycle Plan (Please describe your assessment plan timetable for this outcome)			
Program will be evaluated in the 2021/22 academic year. Course instructors will provide assessment data.			

Student Learning Outcome 3			
Student Learning Outcome	Students will review environmental health-related issues and their implication on public health.		
Measurement Instrument 1	ENV 460 Assignment Direct Measure: Students will identify an environmental health problem related to air pollution, its impact on public health.		
Criteria for Student Success	Students will identify a health problem resulting from air pollution and its impact on public health.		
Program Success Target for this Measurement	80% of students will score 80 or higher on the assignment.	Percent of Program Achieving Target	There were no students enrolled in the Certificate program during the 2020/21 academic year.
Methods	There were no students enrolled in the program during the 2020/21 academic year. The course instructor will provide assignment scores annually.		
Measurement Instrument 2

Program will be evaluated in the 2021/22 academic year.			
Next Assessment Cycle Plan (Please describe your assessment plan timetable for this outcome)			
Program will be evaluated in the 2021/22 academic year. Course instructors will provide assessment data.			

ENV 280 - Assignment – Water Footprint Calculator – ENV 280

<https://www.watercalculator.org/>

Please use the above link to calculate your water footprint and copy and paste your results into Microsoft Word. Once this has been completed, please discuss the areas in which you can reduce your water usage and what you learned from using the water footprint calculator and the water PowerPoints.

	Novice	Competent	Proficient	Distinguished
Formatting	Points: 1 (4.00%) Follows only 1 of the formatting guidelines	Points: 2 (8.00%) Follows only half of the formatting guidelines	Points: 3 (12.00%) Follows all but one of the formatting guidelines	Points: 4 (16.00%) Follows all formatting guidelines
Calculator Results	Points: 0 (0.00%) No footprint results are given	Points: 2 (8.00%) Only the overall total of the footprint is given	Points: 4 (16.00%) Overall total and category totals are shown	Points: 6 (24.00%) Entire footprint results are completed including total score, category totals, and sub-category totals

Content	Points: 0 (0.00%) Results are not discussed and no discussion is given about ways to reduce water usage	Points: 5 (20.00%) Only results are discussed and no discussion is given about ways to reduce water usage	Points: 10 (40.00%) Results are discussed and minor discussion is given about ways to reduce water usage	Points: 15 (60.00%) All results are discussed and thoughtful insight is given about ways to reduce water usage

PH 385: Environmental Health

Blog 1: Environmental Policy and Regulation

Every day in mainstream media, there is a long list of environmental and occupational health stories describing health problems affecting all types of populations. Reflecting on what environmental health is, the goal of this blog is to increase your awareness of contemporary environmental health challenges around the globe and exploring local, state, federal, regional and global efforts through policies to control them with the view to reducing the impact on health of our communities.

Guidelines for the Blog:

The article has to be an environmental or occupational health story that is local, national or international. It has to focus on the health of a population (e.g. air pollution, drinking water contamination, pesticides, toxic waste, etc.) and not individual health.

Write two to three paragraphs on the following:

1. In your own perspective, what is the environmental or occupational health issue discussed in the news item selected?
2. What regulatory/policy framework instituted to address the issue?
3. What influences different agencies (governmental, private sector, not for profit, community, etc.) to initiate and implement abatement/control measures?
4. What is the potential impact of the environmental or occupational health factor to health care and overall public health?

	Novice	Proficient	Excellent
Reflection	<i>Points: 0 – 0</i>	<i>Points: 0 – 0.5</i>	<i>Points: 0.6 – 1.0</i>

	Only includes mere description of theoretical knowledge; no reflection is demonstrated beyond description.	Shows satisfactory ability to relate acquired knowledge to environmental or occupational policy and its administration.	Proficiently demonstrated reflection and deep thinking of acquired knowledge and concepts, and integrate them into different issues from a wide range of perspectives.
Content	<i>Points: 0 – 0.5</i> Questions are not well answered and/or not related to environmental or occupational health.	<i>Points: 0.6 – 1.0</i> One or two of the questions are well answered while rest of the questions are not answered at all or wrongly answered.	<i>Points: 1.1 – 2.0</i> All the questions correctly answered and put in context.
Discussion	<i>Points: 0 – 0.5</i> Only initial post was made. No comments on colleagues' posts.	<i>Points: 0.6 – 1.0</i> Two posts were made, initial post and one comment on colleague's post. Comments merely agreeing with the posts.	<i>Points: 1.1 – 2.0</i> Made three posts, one initial post and two comments on colleagues' post. Comments are thought provoking and understanding of environmental health issue.

ENV 460 Grading Rubric

Learning Outcomes	Exemplary - 4	Proficient - 3	Apprentice - 2	Novice - 1	Score
Compile environmental health information	Information was collected from relevant sources in a manner that provided interpretation of the environmental health issue, problem, or methods applied.	Information was collected from relevant sources in a manner that provided synthesis of the environmental health issue, problem, or methods applied.	Information was collected from relevant sources with some interpretation, but a synthesis of the environmental health issue, problem, or methods applied was not provided.	Information was collected from relevant sources with no interpretation or synthesis of the environmental health issue, problem, or methods applied was not provided.	
Explanation of the environmental health problem	Environmental health issue or problem was comprehensively stated and explained.	Environmental health issue or problem was clearly stated and explained.	Environmental health issue or problem was clearly stated but not explained.	Environmental health issue or problem was not clearly stated or explained.	
Apply methods to assess the environmental health problem or issue	Field and laboratory methods were applied correctly in a manner that provided a comprehensive	Field and laboratory methods were applied correctly in a manner that provided an	Field and laboratory methods were applied correctly, yet not in manner that provided an	Field and laboratory methods were not applied correctly, and did not provide an	

	analysis of the problem.	analysis of the problem.	analysis of the problem.	analysis of the problem.	
Present results of the assessment	Data analysis was correct and presented through a series of graphs and tables that were explained in the report.	Data analysis was correct and presented through a graph or table that that was explained in the report.	Data analysis had errors and a table or graph was presented, yet it was not explained in the text of the report.	Data analysis had errors and a table or graph was not presented nor explained the report.	
Develop conclusions and recommendations of the assessment	Conclusions and recommendations were developed that provided a comprehensive solution to the environmental health problem.	Conclusions and recommendations were discussed that provided a solution to the environmental health problem.	Conclusions and recommendations were presented, but did not provide a solution to the environmental health problem.	A Conclusion was presented, with not recommendations, and it did not include a solution to the environmental health problem.
