Improving Health Outcomes through Evidence-based Practice

Learning Objectives

At the conclusion of this program, the participant should be able to:

Review current topics in nursing practice, research, and education.

Describe the potential impact of Big Data Science on nursing operations, nursing practice and research, and health outcomes

Describe a leadership role for CNEs in guiding the application of Big Data Science in Nursing to support care delivery and population management across the care continuum

Discuss key strategies and actions outlined on a CNE "big data" checklist and road map for implementing Big Data Science in Nursing

Evaluate faith community nurses' perception and utilization of electronic health records.

Examine persuasive technology and self-determined motivation to exercise.
