FIVE KEYS TO EXAM SUCCESS

MAKE A GAME PLAN

1

GET STARTED NOW

Even if you can only commit a short amount of time right now, your brain will start becoming more conditioned to the information and you will cram less leading up to the exam.

2

FOCUS ON WHAT'S GUARANTEED TO BE ON THE EXAM

When you feel confident on the big points from the content, you can go back and focus on the more detailed parts of the information.

3

TALK IT OUT

Talking through the course material with someone else will help you learn more about it. You will either be able to answer their questions or you will know what to go back and look for so you can answer them next time.

4

QUIZ YOURSELF

Ask a parent, friend, classmate or anyone else you may know to quiz you on what you've already studied. You are more likely to remember information you've been tested on than the material you've only reviewed.

5

TAKE CARE OF YOURSELF

You'll be able to concentrate better once you've let your brain work on something else for a bit. Read a book. Eat lunch. Play a video game. You'll come back fresher. If you aren't sleeping, hydrating and nourishing yourself with full meals, you won't be able to think as strongly as you need to to succeed on your exams.

REFLECT, DECIDE, SUCCEED!

LAST DAY TO DROP

Reflect on progress in each of your courses. Are you where you want to be?

Do you have a clear understanding of your current grades and expectations from professors?

Will pushing through lead to successful completion or will dropping a course help protect your GPA?

If you need support in this process, we're here to guide you-- don't hesitate to reach out.
