7.1: Current Program Description

The major in sociology requires a minimum of 31 credit hours and leads to a Bachelor of Arts degree. At least half the total semester hours earned must be in upper-division courses (courses numbered 300-499). A minor or second major is required.

Students may choose one of four thematic concentrations or they may choose a general major. Students may complete more than one concentration and in so doing have both appear on his or her transcript.

However, a single elective cannot count toward completion of more than one concentration (e.g., a student may not count SOCL 362 toward the completion of both “Inequality and Social Change” concentration AND the “Family, Gender, and Sexuality” concentration).

- 1. Identification of course:**
 - 1.1 Course prefix (subject area) and number: GISC 316
 - 1.2 Course title: *Fundamentals of GIS*
 - 1.3 Credit hours: 4

- 2. Current prerequisites requirements:** GEOG 103, OR GEOL 103, AND GEOG 110, or permission of the instructor.

- 3. Proposed prerequisites/corequisites requirements:** None.

- 4. Rationale for the revision of prerequisites/corequisites/special requirements:** GISC 316 is the gateway GIS course and serves majors from across the institution. Students receive all the necessary preparation to succeed in the course as part of the curriculum.

- 5. Effect on completion of major/minor sequence:** No change. GISC 316 is required for GIScience majors, GIS minors, and GIS Certificate.

- 6. Proposed term for implementation:** First available.

1. Identification of course:

- 1.1 Course prefix (subject area) and number: EE 300
- 1.2 Course title: Electrical Engineering Design III

2. Current prerequisites:

Prerequisite(s): Completion of Electrical Engineering pre-major requirements and EE 200, or consent of instructor

3. Proposed prerequisites:

Prerequisite(s): Completion of Electrical Engineering pre-major requirements, EE 101, EE 180, EE 200, and CS 239 or CS 180; or consent of instructor.

4. Rationale for the revision of prerequisites:

The courses EE 101, EE 180, and CS 239 were, until recently, on the list of Electrical Engineering pre-major requirements. These courses were dropped from that list, but are still necessary for students taking EE 300. Also, students are allowed to take CS 180 in place of CS 239.

5. Effect on completion of major/minor sequence:

None.

6. Proposed term for implementation:

As soon as possible.

1. Identification of course:

- 1.1 Course prefix (subject area) and number: EE380
- 1.2 Course title: Microprocessors

2. Current prerequisites:

Prerequisite(s): EE 180 and CS 239 with a grade of C or better and EE 210.

3. Proposed prerequisites:

Prerequisite(s): EE 210, EE 180 (C or better), and
CS 239 (C or better) or CS 180 (C or better)

4. Rationale for the revision of prerequisites:

CS 180 (Computer Science I) is often taken by CS majors and Gatton students, and it covers much of the same material as CS 239 (Problem Solving with Computational Techniques) — algorithmic approaches to problem solving, implemented in a high level programming language. This adaptation has been handled via overrides and exceptions for several semesters; it's something that can now be embedded in the normal systems.

This change should also make it easier for computer science majors and transfer students to take Microprocessors, since Computer Science I is a regularly required course for CS here and elsewhere.

5. Effect on completion of major/minor sequence:

None.

As soon as possible.

- 1.2 Course title: RESEARCH PROBLEMS IN CHEMISTRY
- 1.3 Credit hours: 1-3

2. Proposed course credit hours: 0-3

3. Rationale for the revision of course credit hours:

The Department and Ogden College will use a zero credit hour section of CHEM 399 to track students participating in research but that are not using that activity for CHEM credit, e.g., research students paid via a grant.

3. Detailed program description:

No revisions to required courses are proposed.

4. Rationale for the proposed program change: Several years ago, the graduate program in technology management was renamed “Engineering Technology Management” to better reflect the work the students did after graduation. It is desired to change the undergraduate program title for similar reasons. Also, it is believed that this will aid in the recruiting process for this program.
